Scott E. Thompson

WEB DEVELOPER

OBJECTIVE

I am a growth-focused, ambitious web developer with a passion for learning and teaching. As a lifelong learner, I strive to continually better myself and surround myself with other ambitious, positive people.I'm also a natural teacher and thrive on helping others achieve their goals. I give back by being an admin and contributor for the freeCodeCamp Dallas community. I love my family of four and always try to lead a Christ centered life!

PROFESSIONAL EXPERIENCE

Freelance Web Developer
August 2021 - current

- **Weather App -** https://6217c82bcf3e0600075581ff--platypusweatherapp.netlify.app/ a weather app built with TypeScript, including JavaScript, HTML, and SCSS to call on Rest API to display current and upcoming conditions based on the user inputted zip code. Utilized git commands for version control.
- **Movie Database -** https://github.com/storrence88/favorite-flix cohort project using primarily JavaScript and TypeScript, calls info from an Rest API via Axios to display posters, titles, etc. from trending movies and TV. Includes a search function that displays the same props, styled by global css modules.
- **Mock Restaurant App -** https://github.com/clintonmyers/fcc-mock-restaurant-ui cohort project included JavaScript, React, TypeScript, and styled with Sass. Utilized git commands for version control, Jira workflow, figma design, implemented a hamburger menu, linked pages via React-Router, added image carousel, and designed several pages.
- Actively organizing and hosting events and projects for FCC Dallas.

Como-Pickton CISD, Head Band Director
August 2017 - current
- Organized a variety of tasks for high school and junior high bands including: tracking inventory, upkeep of facilities and instruments, logistics and setup of all trips.
- Communicated times and dates of events, performances, and practices to parents, admin, staff, and students
- Managed time of rehearsals, programs, and trips
